### Plugins to install:

- EOL: <http://plugins.netbeans.org/PluginPortal/faces/PluginDetailPage.jsp?pluginid=36810>
- SCSS: <http://plugins.netbeans.org/plugin/34929/scss-support> + Ruby Windows  
<http://rubyforge.org/frs/download.php/76054/rubyinstaller-1.9.3-p194.exe/noredirect>

### Settings:

- Tools / Options / Editor / Remove Trailing Whitespace: Always
- Tools / Options / Miscellaneous / Files / Ignored Files Pattern: `^(CVS|SCCS|vssver.? \.scc|#.*|%.*%[_svn])$|~$*$`
- Tools / Options / Miscellaneous / SCSS check "Compile on save" and enter path to SASS, e.g. `"C:\Ruby193\lib\ruby\gems\1.9.1\gems\sass-3.1.19"`

### Code standards:

- pear install PHP\_CodeSniffer
- download plugin: <https://github.com/beberlei/netbeans-php-enhancements/downloads>
- add VG code standards to CodeSniffer directory in PHP/Pear
- Choose VG code standards in -> "Tools", "Options", "PHP Tab", CodeSniffer
