Last updated 49 days ago by andrer.

Coding standards related settings needed for Sublime Text 2.

```
{
    // The number of spaces a tab is considered equal to
    "tab_size": 4,

    // Set to true to insert spaces when tab is pressed
    "translate_tabs_to_spaces": true,

    // If translate_tabs_to_spaces is true, use_tab_stops will make tab and
    // backspace insert/delete up to the next tabstop
    "use_tab_stops": true,

    // Set to false to disable detection of tabs vs. spaces on load
    "detect_indentation": false,

    // Set to true to removing trailing white space on save
    "trim_trailing_white_space_on_save": true,

    // Determines what character(s) are used to terminate each line in new files.
    // Valid values are 'system' (whatever the OS uses), 'windows' (CRLF) and
    // 'unix' (LF only).
    "default_line_ending": "unix"
}
```
